The **Laser Disable** is a special safety button which is used to disable the laser output via Ethernet.

Crellestr. 19-20 I D-10827 Berlin I P +49(30)780 963-0 I F +49(30)780 963-25

Advantages

- Simple cabeling, as already placed network cables can be used
- Compatible with Switches and Hub
- Each button or Laser Disable Software sends a “heartbeat” which is received by the connected devices. With this, those devices switch of automatically if no signal is send due to a missing connecting, a broken cable or power failure.
- robust housing (50 x 85 x 133mm)

Compatible

- Lasergraph DSP
- PHAENON accurate
- AVB2ILDA
- PHAENON X with built-in AVB2ILDA

Configuration

In the Lasergraph DSP or the LA Toolbox, up to four independent Laser Disable Buttons or the Laser Disable software can be selected via their IP address.
